Customer Location

Doha, Qatar

Industry

Government

Client Overview

Our Client is a one of the finest racing club in the world with state-of-art facilities.

Platforms

Microsoft SharePoint

Solution

Corporate Portal with Live Streaming

Challenges

Our Client is a one of the finest racing clubs in the world with state-of-art facilities and they continually seek new modes of content delivery for their members.

They want to upgrade their portal and integrate webcasting as a content delivery technology in it. It was an absolutely essential requirement that any tool they selected should be reliable, easy to use and technically unobtrusive. Also they wanted the option of having a webcast events which run on turnkey basis as well as the ability to manage webcasts completely by themselves.

They have situations such as communicating, organizational announcements, processing new policies, communicating new events and plans with members, as well as collecting member feedback.

Solution

Octaware provided them with upgraded corporate portal solution and added a full featured video management and streaming web-part into portal environment which provide them a single point access to all information including live streaming videos.

Solution provide their members to easily log on to portal and access the live streaming or on-demand video quickly and easily from anywhere. With this integration enables them to use central user management and single sign-on, reducing IT work load and saving valuable time and resource. IT administrators can make changes within active directory and these changes will reflect within application with no additional configuration.

Octaware also developed custom web parts for video gallery, image gallery, news rollup, flash announcements, Messages etc. to provide rich user experience.

Platforms Profile

Microsoft SharePoint

Microsoft SharePoint is one of a leading portal technologies. It has been around since 2001. It is a browser-based collaboration, content management and extensible platform from Microsoft.

SharePoint provides collaboration, websites, social networks, intranet and extranet portals, document & file management, enterprise search, websites and business intelligence. It also has system integration, process integration and workflow automation capabilities.

Benefits to Client

➢ The unified portal empowered them to easily manage and publish content such as announcements, job postings, events, business reports.
