

Octaware's iOnAsset is a Scalable Solution for Asset Tracking & Management

Client Overview

Our Client is responsible for leading the expansion of country financial services sector and for developing relationships with the regional and global financial community.

Situation

Founded in 2005, with the aim to help an international banking, insurance firms and other financial services organization to grow and develop a financial services sector in the region. Client have purchased and redistributed assets like computer, laptop, and other assets within the organization. In order to supervise and control the asset movement they needed a comprehensive asset tracking management system.

Challenges

Major challenge the client had been confronting was identifying and locating assets within the organization. They were struggling with monitoring asset movement as they relied on sheets and lists. This method proved ineffective since logging and updating the information associated with each asset was tedious and error-prone. Hence, the absence of an automated way of accurately collecting and compiling their asset data left the organization vulnerable to potential property loss.

CHALLENGES

- Asset Identification
- Asset Tracking
- Manual Paperwork's

BENEFITS

- Quickly **locate** critical equipment
- Enhance **productivity** by remotely monitoring assets
- Detailed **Asset Reporting & Auditing**
- **Centralized, Scalable and Secure** Database.

Solution

Octaware provided the client with barcode and web-based asset tracking solution (**iOnAsset**) that fits their needs. Our solution enables the organization to uniquely tag their asset with the barcode and track their allocation and movement.

iOnAsset automates asset-related transaction and record keeping by simply scanning barcodes. Our solution helped them to virtually track any asset, of any size from furniture to IT equipments. iOnAsset enables the user to access the data in a centralized database as required.

Octaware's solution made it easier for client to manage and track where our assets are, who is responsible for them and help them better allocate their assets.
